

Sprint 3 Report  
ChemPuzz  
Chemistry Sux  
July 22, 2019

**What we should stop doing:**

While we no longer have anymore sprints left to do, one thing we should stop doing is showing up late to sprint meetings.

**Actions to start doing:**

We need to start arriving on time. We also need to start expecting more obstacles and have more backup plans.

**Actions to keep doing:**

We need to keep having good communication between members. We should also keep working hard and to keep making a list of what we need to get done.

**Work Completed:**

1. As a player I want a transition to the next level so that I can advance further into the game.
2. As a player I want a timer to make the game more challenging and exciting for me.
3. As a player I want a score tracker to make the game more challenging and exciting for me.
4. As a player I want additional levels with increasing difficulty so that I can have a fun and complete gameplay experience.

**Not Completed:**

1. As a player I want 5 levels of gameplay so that I can learn more about chemistry than with less levels.

**Work Completion Rate:**

- 4 user stories completed
- Total work hours for third sprint: 19 hours
- Number of days for the third sprint: 6
- User Stories: 1-2 per day

- Hours per day: about 4-6 hours
